Data extracts created for the RDC

year_submitted	files_created
2017	14
2018	11
2019	7
2020	5
2021	6
2022	3
2023	8
2024	7
2025	1

Data extracts created for the RDC

NOTES ON CREATING SLIDES IN QUARTO

Notes on creating slides in Quarto

- **Goal:** Create a reproducible workflow in R to generate either slides or a report with underlying RDC data utilizing NCHS formatting standards
- **Rationale:** Time saved by automatically formatting slides uniformly each time even if the underlying dataset changes

Notes on creating slides in Quarto

- **Process**
 - Had to build new slide template from scratch for Quarto compatibility
 - Needed to ensure consistency of underlying data fields
 - Tracked and resolved different rendering errors

Notes on creating slides in Quarto

- **Next steps**

- Ascertain where to centrally store code
- Build in 508 compliance
- Resolve Rmd error messages
- Figure out efficient processes for editing/collaboration
- Improve table formatting
